## PHOTO-ME'S WASHING TECHNOLOGY GROWING RAPIDLY IN RESTAURANT SECTOR

**Photo-Me International**, continue to shake up the market with their 'Revolution' technology – outdoor laundrettes with economic, commercial, and environmental benefits. Self-access machines are used in a growing number of areas (installed in various sites around the UK) including construction, retail, leisure and the public sector in universities as the latest technology for departments to procure.

The Revolution Compact and Compact S as operated by Photo-Me, are ideal for washing large or heavy loads such as duvets, blankets and pillows finishing in a record time of 30 minutes per cycle. The external launderette service open 24/7 is the latest innovation in mass washing facilities contributing to a huge increase in footfall/revenue for retail sites with environmental benefits too.

The Group operates approximately 47,000 vending units across 18 countries and its technological innovation is focused on three principal areas identification (photobooths), laundry services and high-quality printing kiosks.
